Assembly instructions

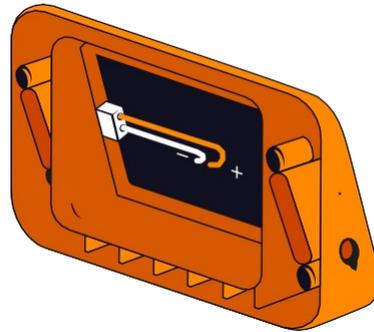

Components list

Watu solar light in 12 pieces

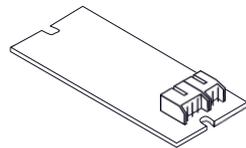

1 Front case

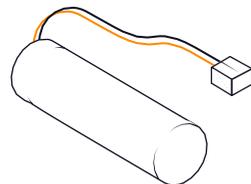

2 Back case

3 PCB

4 Baftery

5a Bufton sticker

5b 4 screws

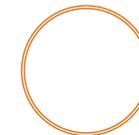

5c 2 small screws

5d PH1 key

6 O Ring

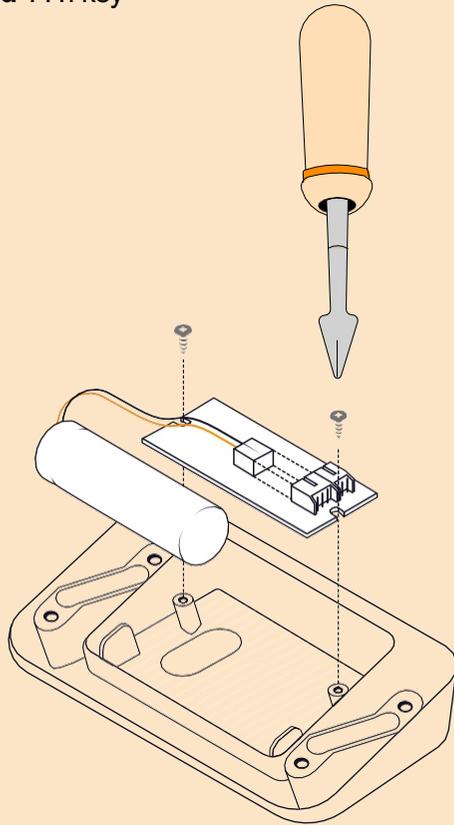

7 Stand (not illustrated)

8 Headband (not illustrated)

Step 1

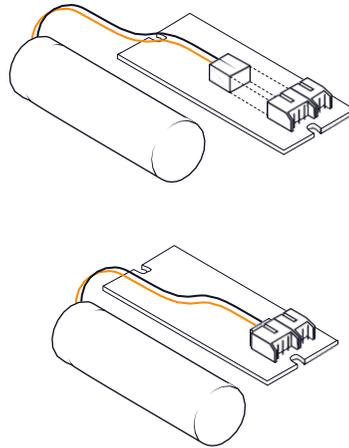

Connect the battery to the PCB electronics

- 1 Front case
- 3 PCB
- 4 Battery
- 5c 2 small screws
- 5d PH1 key

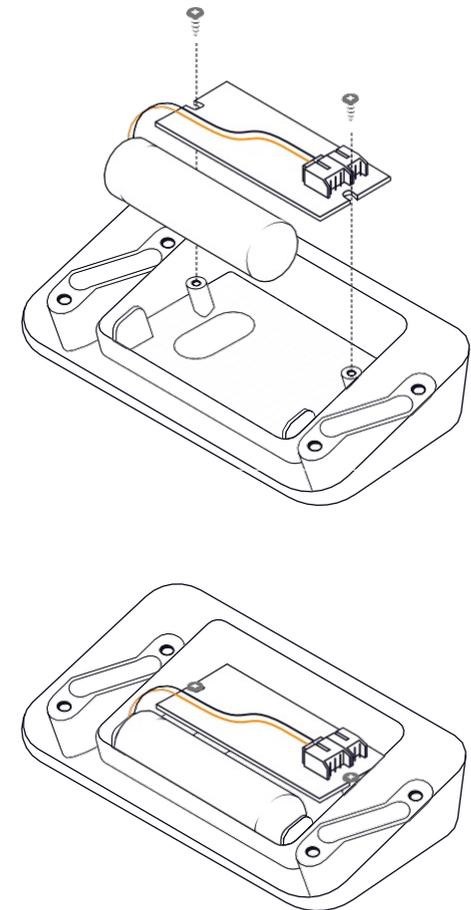

1a Connect the battery to the PCB

HINT Make sure you connect to the bigger connector!

1b Screw in the PCB

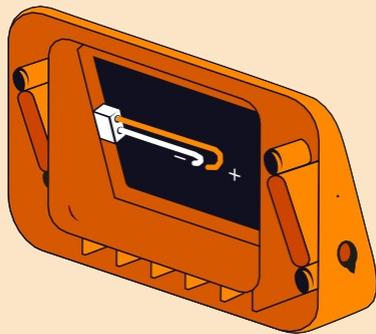

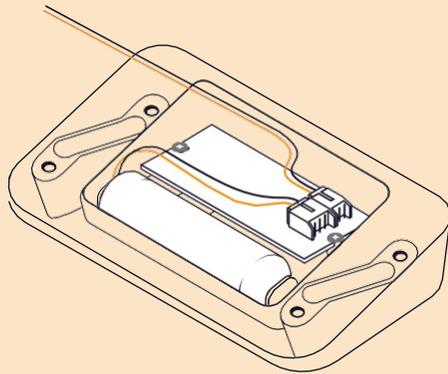

HINT Use the PH1 screwdriver

Step 2

Connect the back case wire to the PCB

2 Back Case

2a (Optional) Position the O-ring around the transparent part of the front case

HINT Ensure the O-ring sits evenly in its groove to maintain a proper seal between the front and back cases.

NOTE This step improves water and dust resistance. Skipping it may reduce the device's IP rating.

2b Connect the PV module to the PCB

HINT Make sure you connect to the smaller connector!

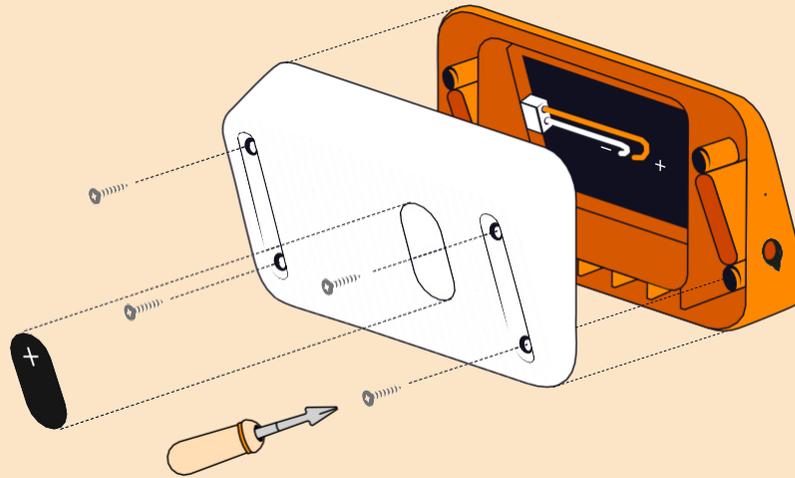

Step 3

Close the case with the screws

5b 4 screws

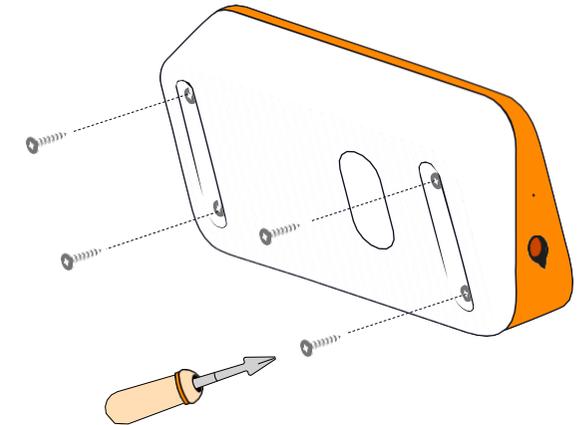

5a Bufton sticker

5d PH1 key

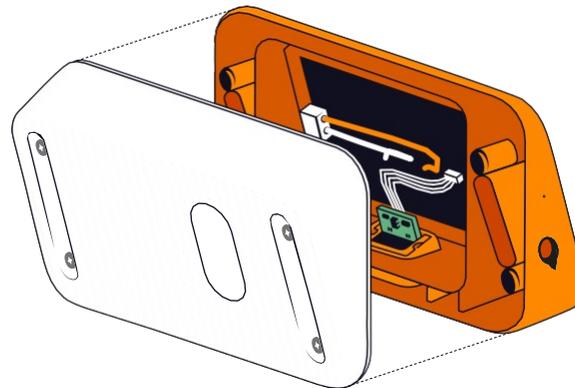

3b Close the case with the screws

HINT Use the PH1 key to tighten the screws!

3a Close the cases.

3c Apply the sticker to the front

HINT Make sure you stick it down really tight!
